

This image shows a blank white page. At the very top, there is a thin, dark horizontal bar, likely representing the edge of a scanner or a binding element. The rest of the page is completely empty and white.

The screenshot displays a Google Colab notebook environment. The notebook is titled "17_Build_Your_Own_Intelligent_Internet_Search_Engine.ipynb". The code cell contains a list of URLs being processed, with progress bars and completion status for each. The right sidebar shows the "Resources" tab, indicating that the user is not subscribed and has zero compute units available. The bottom status bar shows "Executing (37m 49s)" and "T4 (Python 3)".
